and Cyber Security

THE HYPE IS REAL!

Prepare, learn skills and qualify for a rewarding career in the high-growth field of data analytics. Get professional training with practice environments, study coaching, career coaching and recruitment services to springboard your career into top employers.

Data analysis involves collecting raw data and finding patterns and trends in the data using mechanical techniques and algorithms. The meaningful information gained from data analysis aids in making accurate predictions and business decisions to help businesses grow and thrive.

Graduates from this programme are armed with the skills and qualifications to work in a variety of analyst roles like data analyst, product analyst, business analyst, sales analyst, financial analyst or quality assurance analyst in addition to other roles.

The demand for data analysts is high, and it only continues to increase due to analysts helping businesses make data driven decisions that improve and strengthen organisations.

With the study coaching, mentoring and student support provided by ITonlinelearning, you have the best chance of successfully completing your studies and enjoying flourishing career.

WHO IS THIS FOR?

The personality of a Data Analyst is someone that is organised, detail-oriented and enjoys working in a structured environment. You will be well suited if you have IT skills, analytical skills and are good at solving problems.

CAREER PATH & SALARIES

CAREER PATHS AND POSSIBLE SALARIES IN £

ADDED BENEFITS

We take great pride in delivering a fantastic level of service which continues beyond your initial course purchase. We strive to go the extra mile by providing additional features such as course mentors, qualified tutors, career and job interview advice, CV writing assistance and general support to all of our students.

Mentor Support

Your mentor will assist you with any general enquiries relating to your learner journey with us, from exam costs and bookings, to enquiries about your learning management system (LMS).

They will be on hand to pro-actively support and motivate you throughout your studies, as well as creating a personalised study plan to help make studying easier.

Career Support

Career Support is provided by our specialist in-house recruitment team to help you succeed in the complex job market. This service is exclusively for ITonlinelearning students needing this service who have passed official exams and are ready to start their job search.

Along with a professional CV review and LinkedIn profile you will receive our Recruitment Pack which is packed with useful information, CV templates & guidelines, cover letters, interview preparation and a guide to our 4 steps to succeeding in the job market.

Tutor Support

Our tutors are available to speak to over the telephone or via email. They are here to help you with any course related questions, as well as exam revision and preparation. What's more, all of our tutors are fully qualified in supporting you with your studies.

PAYMENT OPTIONS

We offer various payment options to help you get started on your course.

- 1.** You can opt to pay in full and upfront for your course. Through our third-party partnership with Omni Finance, we are able to offer our students a stress-free alternative to paying a lump sum. You can spread the cost of your studies over affordable monthly payments from 6 to 12 months at 0% interest. This finance option can be used to cover course fees, exams and any study manuals you might need.
- 2.** Where students do not qualify for Omni Finance, we offer monthly spread payments in-house through ITOL Finance. Our finance plans are flexible and work around your commitments, they are interest-free and cover the cost of the course component only. Therefore, if you opt for ITOL Finance this does not cover the cost of exams and manuals. However, you can call the exam booking team at any time to pay for exams and manuals as you need them.

It's important to us that we provide you with courses to further your career or embark upon a new one without getting into financial difficulty. These finance plans were created to give you peace of mind, should you require them.

FAQ'S

These are some of our most frequently asked questions. Please get in contact with our Career Advisors to answer any further questions and help you get your new career journey started.

→ Are your courses accredited?

Yes. We are a CMI, APMG, PeopleCert, BCS, CompTIA and CodeCademy authorised training center.

→ What finance options do you offer?

We offer finance through our third-party finance partners, Omni Finance and Premium Credit, where you can spread the cost of your study package and exams over affordable monthly payments. This is the preferred option for our students not paying in full.

As an alternative where students do not qualify for Omni Finance or Premium Credit, we offer monthly spread payments in-house (ITOL Finance) which are interest-free and cover the cost of the course component only. ITOL Finance, therefore, does not finance the cost of exams and manuals. You can however at any time contact the exam booking team and pay for exams and manuals as you need them.

→ Are exams included in the price?

As stated above, if you have paid in full or been accepted through Omni Finance or Premium Credit, then all exams are included, including the cost of the oral exam.

FAQ'S

→ Why must I complete my exams before getting a job?

Hiring managers consider qualified job-seekers to be a lower recruitment risk who can hit the ground running and be more productive quickly. You must put yourself in the shoes of a busy recruiting manager to understand why this is the case. This course, however, also includes a practical element that requires mastery.

→ What recruitment support do you offer?

Once you have completed your studies and relevant exams you are then supported by our recruitment team. They will provide you with a professional CV review and LinkedIn profile, job seeking advice, interview advice and support you each step of the job seeking process. You will proactively work with our recruitment team as they support you.

Our aim is to empower you, so you have all the skills needed to secure and master interviews to land the job you want to get. These are skills for life and can help you at any point in your career when you want to change jobs.

→ How will I benefit from completing this programme?

A rewarding career enables you to grow and develop. You will harvest what you invest in yourself. After this programme you will have learned new skills and validated them through exams and mastery of skills. This adds value to your CV and opens doors to new career opportunities.

FAQ'S

→ How long on average before I can find a new job opportunity?

This depends on how long it will take you to pass your exams. It also depends on your location and the number of opportunities close to you. We aim to ensure you secure a new job opportunity within 12 months of completing your final exam. However, on average, most students secure a role within four months of passing their last exam. Please note, our recruitment support only kicks in once you have passed all your exams as this is when your CV will stand out with your relevant certifications and skills.

→ How does the job guarantee work?

In the event that you have passed all certification exams in this package at first attempt within twelve months of registering with us, and do not secure a job placement within one year after passing your last exam, we will refund your study fees less the cost of your exams. This is subject to you conducting yourself in a professional manner, accepting reasonable job offers and working proactively with our recruitment team. It is also subject to you being a UK resident for at least five years, having a good command of English, paying your study package in full or not missing any monthly payments, if you are paying via spread payments. Our Terms and Conditions / Terms of Learning also apply.

→ Can I opt out of recruitment services and your job/ money-back guarantee?

Yes, you can opt out of recruitment services and the job/ money-back guarantee. If you do not need these services, the cost of your package will be reduced, however this can only be done prior to registering for this study package.

FAQ'S

—> What is the best study path for me to follow?

The first step is the study the official CompTIA Data+ course to give you a solid foundation knowledge, prepare for the official exam and take the CompTIA Data+ exam. You will then study, practice and master Microsoft Excel for Data Analysis. Next study, practice and master SQL with the Learn SQL course. Next study, practice and master Python with the Lean Python 3 course. Next study, practice and master Tableau. Lastly, study the BA Foundation course and prepare and take the official exam.

—> What are the average study times for each course?

This varies from course to course and from person to person. Foundation courses typically take 20 hours or more to study and prepare for exams. Programming courses require mastery of each language.

—> I'm already working, can I study around my current job?

Yes, this study programme is flexible and designed for career starters and career changers that might be working in jobs that do not align with their career goals.

—> If I run out of time, can I renew my training?

You can renew your studies for another year if you need to. You can also add other courses at that time to meet your career requirements. We have a renewals team and a renewals advisor who will be in contact as you near the end of your study term.

FAQ'S

→ Once I have completed my studies, can I study further?

Yes, there are further UK accredited project manager, business improvement, best practice and manager courses we offer to further strengthen your CV and portfolio of skills.

WHAT DO OUR STUDENTS HAVE TO SAY?

We have a very active TrustPilot review page, are rated Excellent and have an average TrustScore of 4.8 out of 5. Here are just a couple of our reviews.

The team have been fantastic and the course very informative and interactive. Andy has been very helpful in connecting me with all the recruitment people in helping me navigate the best courses for me. Lusanda has been very caring and diligent to ensure an efficient process. Can not recommend IT learning enough!

- Haydar Dar

The great experience is the friendly approach by the tutor, who explains everything in great detail, making the sessions very helpful for someone who takes time to learn. The company is doing very well in supporting gender/racial equality, diversity and special needs trainees.

- Richie Roy

I've used ITOnlineLearning for 3 qualifications now and it has been excellent each time. The service they provide is great and questions/issues are responded to very quickly - I've had help from Lusanda today who has resolved my issue very quickly. Everyone I have dealt have been lovely and the course materials have been thorough and interesting. Thank you!

- Ronnie Tindall-Lea-Fosh
